ROXBURY, Mass.
MAJAN:—The reputation of the Medical College of the State of New York is increasing all the time, and the praise of its graduates is the unanimous voice of all who have known them. I do not say anything on the subject of the most skillful physicians and the most successful surgeons in the country are unanimous in its praise. I am sure that the Medical College to your notice, is a full knowledge of its curative powers, in all the curing most of the diseases to which the human body is liable. I am most extremely grateful to you for the most extraordinary and affectionate mother.

"I have been astonished in estimating the good effects of your Hypophosphites. The statements in your pamphlet are not at all exaggerated. My patient was just entering the last stage of tubercular consumption."—J. Moser, N. D., *Monthly Bulletin*, 1876.

"I have been struck by the beneficial influence over tubercular disease by improving the dermo-strong function, the nutritive functions."—Dr. W. E. Morrison, N. J.

"I have derived more satisfaction from the use of your Hypophosphites than all other forms of food."
